Calendar Rules, Concept Commentary, & Definitions:

Calendar Year is 364 Days as stated 5 times in 1st Enoch, twice in Jubilees, & twice in the Dead Sea Scrolls

Jubilees 6:32-38 is an explicit prediction / prophecy that the calendar year is **NOT** a 354 Day Lunar Calendar and will be in severe ERROR of Feast Days and Sabbaths and Months, and Years, and more.

The Spring Equinox is the 365th Day of the Solar Cycle and **NOT** part of the 364 Day Calendar Year.

Job (who is pre-flood) cursed the day he was born and had it removed from the reckoning of the year per Job 3:1-26. This is why the calendar is 364 Days and **NOT** a complete solar cycle of 365.24 Days.

The Spring Equinox separates the calendar years as per Enoch 72:32-33 "through the course of the sun these distinctions are made (literally "they are separated")" R.H. Charles inserted his commentary into the text to emphasize the literal meaning of the Ethiopian.

The Spring Equinox calibrates / re-calibrates / resets the calendar year and also the days of the week per Jubilees 2:9.

Jubilees 2:9 "And Elohim appointed the sun to be a great sign on the earth for (week) days and for sabbaths and for months and for feasts and for years and for sabbaths of years and for jubilees and for all seasons of the years."

The sun's casted shadow on the Spring Equinox is the Great Sign ON the earth and it calibrates everything mentioned in Jubilees 2:9. So we sync our days on earth up to heaven and the heavenly Sabbath that goes on in heaven.

New Month = Rosh Chodesh in Hebrew which means Head (Rosh) of a Renewing Cycle (Chodesh). The renewing cycle (chodesh) is the renewing cycle of 30 days intervals.

The 4 intercalary days of the seasons are in solar portals 1, 3, 4, & 6 as per Enoch 75:1-2. These days are part of the 364 Day Calendar Year but not part of the 360 Day Prophetic Calendar Year as per Enoch 75:1-2.

As YHWH Elohim's calendar is 364 Days and excludes the Spring Equinox which is 365th Day of the Solar Cycle, the 360 Day Prophetic Calendar excludes the 4 intercalary days of the seasons of 364 Day calendar.

So when one counts the prophecies of the 1,260 Days in Revelation or the 1,290 Days and 1,335 Days in Daniel or the 430 Days of Ezekiel the intercalary days of the season and the day(s) of the Spring Equinox are not included in the reckoning.

The "24 Hour" Day begins at Sunrise **NOT** Sunset per the order in 1st Enoch chapter 72 regarding the first law of the lunaries which is the sunrise and more so YHWH Elohim's words Jeremiah 33:14-26. The gospel writer of Matthew 28:1 gives the most detailed specific account.

The Book of Jubilees is explicit to sunset start day but I identify this as leaven of the Pharisees. In Jubilees 20:24-24 the flood account, it says the rain started the night of the 17th but then they say it rained 40 days & 40 nights; they made an error as to the order of 40 "days & nights."

Yom Kippur starts on the evening (sunset) of the 9th. to the evening (sunset) of the 10th Day of the 7th Month per Leviticus 23:32 and this seems to be the precedent to the fasts of the 4th, 5th, and 10th months, they also start at evening (sunset) the day prior.

The First Fruits Barley Wave Sheaf does not take place during Unleavened Bread but it follows the Sabbath after Unleavened Bread per Dead Sea Scroll Temple Scroll.

Calendar calibration is verified by pegged day & dates in Dead Sea Scrolls: 4Q252 The Flood Account, 4Q394 The Sectarian Calendar, The Temple Scroll, & more. Dead Sea Scrolls that incorporate lunar calendar observations & dates I understand contain error per Jubilees 6 prediction.
